WORK EXPERIENCE

B3N Industries (Startup) — Lead of Digital Systems & Technology

Remote (United States)

January 2026 – Present

- Lead in the development and maintenance of the B3N Industries website.
 - Designed and managed internal digital systems and business workflows.
 - Supported software development for B3N products and services.
 - Managed cloud services, hosting, and digital infrastructure.
 - Advised leadership on emerging technologies and digital strategy.
 - Helped ensure the reliability, security, and scalability of company technology systems.
-

Central Bank of Trinidad and Tobago - Intern

2024

- Managed high-volume database operations using Microsoft Excel and specialised financial software (FEDM/FAME), ensuring data integrity and operational accuracy.
 - Conducted analytical research on direct investment liabilities and produced a technical report proposing modern technological solutions for automated data collection and analysis.
 - Researched data collection methodologies and carbon footprint frameworks used by international banking institutions, translating findings into actionable recommendations.
-

Norman Gabriel LTD Insurance Brokers - Intern

2022 – 2023

- Managed high-volume physical and digital filing operations, improving document organisation and accessibility.
 - Performed bank reconciliations by cross-referencing financial records to identify and resolve discrepancies.
 - Assisted with document management and administrative processes while maintaining compliance with company record-keeping standards.
-

EDUCATION

Bachelor of Science in Information Technology (Special)

The University of the West Indies, St. Augustine
2025

Fatima College

2013 – 2018

TECHNICAL SKILLS

Programming Languages

Python, C++, PHP

Web Development

HTML5, React, RESTful API Development

Databases

MySQL

DevOps & Tools

Git, Docker

Methodologies

Agile Development, Sprint Planning

Projects

Oil & Gas Price Tracking Dashboard

Live Demo: <https://oil-gas-tracker.netlify.app/>

Technologies: React, REST API, JavaScript, HTML, CSS

- Developed a responsive web dashboard that tracks global crude oil and natural gas prices using real-time market data.
 - Implemented interactive data visualisation and automated API integration to present current pricing trends in an intuitive interface.
 - Designed with a focus on performance, usability, and responsive layouts across desktop and mobile devices.
-

Preoperative Evaluation System

Technologies: Flask, Python, SQLAlchemy, SQLite/MySQL, HTML, CSS, JavaScript

- Developed a web-based preoperative evaluation platform enabling surgeons, nurses, anaesthesiologists, and patients to manage surgical assessments and scheduling.
 - Implemented secure user authentication with role-based access control for multiple healthcare professionals.
 - Designed digital preoperative questionnaires and workflow automation to streamline patient evaluation before surgery.
 - Built using Flask, SQLAlchemy, HTML/CSS, JavaScript, and SQLite/MySQL.
-

Interactive AR web application

Technologies: HTML, CSS, JavaScript, AR.js, A-Frame (if applicable)

- Developed an interactive augmented reality (AR) web application that delivers immersive 3D experiences directly through a web browser without requiring a dedicated mobile application.
- Integrated browser-based AR technology to recognise markers and render interactive 3D objects in real time.
- Designed and implemented responsive user interfaces to ensure compatibility across desktop and mobile devices.
- Demonstrated practical application of modern web technologies and augmented reality frameworks to create engaging user experiences.

Homelab & Self-Hosted Infrastructure

Technologies: Ubuntu Server, Linux, Networking, Self-Hosting, SSH, System Administration

- Converted a secondary laptop into a dedicated Ubuntu Server to create a personal homelab for self-hosted services and infrastructure.
- Configured and maintained Linux server environments, including remote administration via SSH and system monitoring.
- Deployed and managed self-hosted applications, including a media streaming platform and additional network services.
- Configured networking, storage, and server services to ensure reliable 24/7 operation and accessibility.
